### GREAT RAILROADS JOINED IN HARMONY OF INTEREST.

COMMUNITY OF INTEREST IN WALL STREET.

Mr. Powers, the famous financial expert, has his own opinion of how much the promoters of the new community of interest love one another. They wear armor to keep stray knives from wandering into their anatomy, and carry weapons purely as an evidence of good faith. T weapons purely as an evaluate of good fattle.

### Most Far Reaching Yet Attempted.

PHILADELPHIA, June 7.—The first steps in what will be the greatest consolidation of railfroad interests the world Balance of Market Was has ever known were taken yesterday, when President Cassatt, of the Pennsylvania Railroad Company, and President Baer, of the Philadelphia and Reading Company, held a conference in the Reading Terminal.

conferences between the Morgan and

"community-of-interest" plan which confront the Pennsylvania and Reading

Baltimore and Ohio Railroad.

Philadelphia Mix-Up.

The Baltimore and Ohio, now being practically a Pennsylvania line, still runs its New York trains via the Reading's tracks to Jersey City. There have been all sorts of rumors afloat—one in particular which has been omicially denied-that the Baltimore and Ohio trains Bit 4 Ohio Baltyn Rapid Fransit. Hookin fap. Transit would upset some of the Reading's cai-

cuiations.

In speaking of this matter yesterday, one close to both of the roads said there was no danger of any war between the two lines; on the other hand the problem would be settled peaceably, for the Morgan interests and the Pennsylvania's were daily becoming closer and that the Baltimore and Onio would be the means of linking themost under one head perhaps, but in complete harmony working for the best interests of all concerned.

plan.
The conference between Mr. Cassatt and Mr. Baer probably means action that will entirely defeat Mr. Gould's scheme, make harmony certain and insure the success of Mr. Morgan's tremendous consolidation plan.

In the West, Too.

Nor will the Morgan-Pennsylvania Interests only be one in this State. Al-gready they are clasping hands in the West. Nor will the Morgan-Pennsylvania interests only be one in this State. Already they are clasping hands in the
West.

From a source considered trustworthy
it was learned to-day that Morgan
is seks to bring about harmony of relations between his Eastern railroads and the Northern Pacific, Great Northern and Burlington on the north and the Atchison on the south, thereby having a great network of lines which can be Agended on for interchange of traffic in case Messrs. Gould and Harriman try to disturb the situation.

Walle Mr. Morgan and the Pennsylvania in the Morgan stock, they have a very large sempany. The Brie and Southern Reading 1 feeling the Atchison, and it will be possible to interchange a great deal of some sempany. The Brie and Southern Reading 1 feeling 1 feeling

\* SUMMERISH

his proposition. For city people are mighty glad to get into the country for the summer, and will put up with almost any inconvenience. They know that country air is good for them. It takes the kinks out of their

mentality and makes them years younger. The song of the reaper massages away the indentations made in their brow by the clatter of the stock-ticker and the sewing-machine.

But even a trip to the country will not give any one the secret of perpetual youth. It has taken a woman to discover that. The woman is Adelina Patti, the most wonderful singer who ever reached high C. She is now nearly sixty years of age, and, in her third honey-moon, is as young and girlish as a maid of twenty-five. She says:

But that's for you to find out. It's worth finding out, too. Anyway, with the strides science is now making it is scarcely necessary to go out of town for a change of air.

From City Hall Park to the top of Pike'n Peak No longer's a journey of over a week. From inland to seashore is not an hour's ride. From summer to winter is scarcely a stride. With a wondrous machine that can regulate air So that if you've a "pet place" you'll think you are there. The wonders of science are no longer wonders. We have come to expect anything we hear about nowadays. Still,

this newest invention rather startles one when he learns that it enables a person to enjoy all the benefits of mountain or seashore in a very few moments merely by the turning of a crank. But people will go away to the summer resorts yet awhile, so that this invention is not going to revolutionize the world right

It is different with Edison's latest storage battery. Atlas might have carried one in his pocket. It would have enabled him to hold up the earth with very little exertion. So with Hercules, the first great strong man. And with others. Edison is a wonder you know that. But nothing that he has ever done the phonograph, kinetoscope or anything else, has been of so much importance to humanity as this latest creation. You have never seen it described. Next But begone with science, however interesting it may be.

I used to think Priscilla was a daisy.

Dressed in her furs and muffied to the chin.
Her winter beauty drove my senses crazy.
At once to make her mine I started in.
But when I saw her, lately, gowned for summer,
I realized I never yet had guessed
Her actual beauty. Jove' She is a hummer;
So's any girl in this year's fashions dressed. Of course, this doesn't take in monstro ities, but the girls whom we have admired all winter. Yet, no matter how pretty they may

be, they cannot attract us unless they are ladylike. That's the great secret of a woman's power over man. Gentleness! Without it she is nothing. One New York girl found it out. She discovered that while she was more than passably pretty, she had not the man-ners of a true lady, and she was brave enough to ask how she could learn them.

We referred her to a young gentleman eminently fitted by birth

and training to instruct her in the finer details of society deportment. She has had one lesson, and if you read this paper last Sunday you know what an excellent thing it was, and how worth study-Next Sunday No. 2 will appear, in which the Earl of Yar-mouth, who is the young lady's instructor, will tell how he helped her select the right kind of hats, &c., and gave her instructions in other important matters concerning the appearance of a young girl

who would shine in a higher station. Oh. I am a monk, and a pirate bold,
And a Cupid with a bended bow,
And an Arab brown, and a man-about-town,
And an king and a peasant low,
And an angel in wax, and—I state but facts—
A princess, a Hercules,
And a duke and an earl and a pretty girl,
Or anything else you glease:

Being an artist's model, it is really nothing astonishing that a man should play all these different parts on the posing throne. Still, the list quoted above shows a versatility well-night unparalleled but absolutely correct. A famous model is the one in question. He has posed for everything imaginable except such things as trees, bottles, oranges, fish and those still-life exam-

You would scarcely believe what a help he has been to some of the foremost artists of the present day. But you can easily learn if you played at these different parts. He has posed as a giant, no doubt, but has never been one. Now comes a great French scientist who

A pleasant place to spend an

evening—yea? The most remarka-ble criminal who ever conceived schemes had just such an carablish-

ment and just such a way of enter-

taining his friends as we have described versifically above. But they

Maybe no more sorry than the

average mother will be to learn that all har fond hopes centred in

her boy are for naught. It is her daughter who is to be the bright,

shining light of the family hereaf-

She was a dainty little maid,
Of maybe eight foot nine.
Her pretty shoes were number twelves,
Her gloves were number nine.
Her waist was only four foot five,
Her neckband eighteen inch.
To clasp so small a form as hers
Were certainly a cinch.

Not these words exactly, but his intent is to raise a race of gigantic people. Six feet and three inches is his low limit for men and seventy inches for women. He thinks he knows how to do it.

He had a few friends who were much in his So he thought of a scheme to get rid of

He dug a large hole in the sand—
He dug it alone, with his hand—
And invited his friends please to call at his
house; And they say that no person, not even a Ever saw either hair or the hide of 'em!

ter. No? Yes! A machine has been invented to test the intellectuality of the sexes in children, and the girl has come out ahead—'way ahead. But pshaw! We are so used to letting femininity have its sway that we must admit the fair sex's superiority at any time, or—take the consequences. Just now, in the month of roses, &c., &c., the girl

Especially at the summer resorts. There she is a bigger attraction than even the sea serpent.

on than even the sea serpent.

I had three wishes.

First I wished

To be a king who had
All others dished.

Second, I wanted wealth,
Then wondrous power.
Third, I took back the two
And thought an hour.

Then for my third I joined in one all three.

"Make me," I cried, "a summer girl!" So be!

There is the happy lot! Why would we go to the mountains or a sea but for her?

the sea but for her? And, recognizing that fact, we give her full sway in the OUTING SUPPLEMENT (a very important NEW part of the Sunday paper). We also dilate largely upon all the sports of summer time, all the news of the summer resorts, and everything summery. Then there are the Comic Supplement, the Editorial Section and an interview by Lavinia Hart with Rev. E. J. Hardy, the author of "How to Be Happy Though Starried," on important topics. Besides hosts of other things in

NEXT SUNDAY'S WORLD.
